## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance: prior art fails to teach the disclosed invention.

Regarding claim 1, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a vehicle light comprising lamp body, front cover, and a light guide, wherein the light guide reflects light emitted by an LED within a light guiding member of elliptical shape having coupled focal points and an LED positioned near at least one of the end focal points at both ends.

Regarding claim 8, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a vehicle light comprising lamp body, front cover, and a light guide, wherein the light guide reflects light emitted by an LED within a light guiding member of elliptical shape having coupled focal points joined together radially creating a shared focal point. Prior art further fails to disclose an LED positioned near the shared focal point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cibie (US 4,389,698) discloses a lens having a coupled, elliptically shaped backside wherein the elliptical shaped share focal point. However, Cibie fails to teach this

technique in the form of a light rod. Tai et al. (US 5,506,929) teaches a light guiding member wherein one embodiment discloses elliptically shaped microprisms; however, these microprisms do not share focal points. Hering et al. (US 6,367,957) teaches the benefit of using light rods within vehicle lamps; however Hering does not disclose a desired shape for the light rods nor is it disclosed the use of the light rods along with normal braking, reversing, and turn-signal lights.
